

LET KINDNESS BE YOUR LEGACY

Sabetha Elementary students are learning reading, writing and arithmetic. But maybe even more important they are learning about **KINDNESS**.

With the help of the Neighbor-2-Neighbor organization, SES students tangibly experienced an act of kindness by raising money to help build a shelter for Pat, their beloved crossing guard. This week it continues as SES embarks on "The Great **KINDNESS** Challenge."

Yes, it is important to teach kindness. There was a time when schools were too busy testing to teach "soft skills," such as **KINDNESS**, work ethic, conflict resolution, teamwork and collaboration. Thankfully, today this is changing.

In our community there are many ways to carry out acts of **KINDNESS**. There are many who do this on a regular basis. Many **KIND** people work at the local food pantry, volunteer as firemen, coach youth sports teams, serve as a 4-H or scout leaders or attend a families as hospice volunteers. These people and others who volunteer, donate to causes or even just share a smile have experienced the results of being **KIND**.

Join SES in the **KINDNESS** Challenge by allowing GSCF work with you to make a lasting difference in your community to create your **KINDNESS** legacy. Establishing a Donor Advised Fund will allow you to make charitable contributions, receive an immediate tax benefit and then make transfers from the fund to your favorite charities later. A DAF is simple and flexible and allows anyone to be **KIND** to our community through philanthropic giving.
